

OIE

A SYSTEM DESIGNED TO INTERVENE DURING SPILLAGE FROM A SUBSEA WELLHEAD, WHEN DIRECT VERTICAL ACCESS IS NOT POSSIBLE

KEY FACTS AND FIGURES

The OIE (Offset Installation Equipment) makes it possible to install the “capping stack” and the auxiliary equipment while remaining at a safe distance from the point of intervention.

It is operated from the surface by Work Class ROVs.

- Radius of action: 500 m.
- Water depth: 75 to 600 m.
- Won “Spotlight on New Technology” prize in 2019 by the OTC
