

Trieste Valley

TRIESTE VALLEY SRL. It is the latest company born in the galaxy of the Biovalley Investments SpA group with the aim of accelerating, through research and innovation, the economic development of the territories with the digitization, above all, of companies operating in the health sector.

The Company purpose is to involve in its projects companies, universities and research institutes located mainly in the of Italy and the countries of Central-Eastern Europe and the Balkans.

To pursue this Vision, the Company has begun to offer High Performance Computing services with its own Cloud Data Center installed in Trieste (with Eurotech technology) to innovative start-ups and to Public and Private Research Institutions in the digital sector and in particular in the IoT and artificial intelligence sector.

The name of Trieste Valley refers to the competitive advantages enjoyed by the city of Trieste, having the highest European density of high-profile researchers, who have fostered the growth of small-sized companies, but particularly lively in the processes of innovation in the ICT sector.

In this regard, are worth mentioning the services offered to Trieste Valley by RNB Gate for AI and Big Data Analysis, Glance Vision and Data Mind for AI applications in the Health sector. To these advantages is also added that of being a city geographically located in the centre of Europe and a bridge to offer integrated IoT and AI services to industries, universities and industrial research institutions in the countries of the Balkan area.
